EDUCATION

Gaziantep University

Occupational Health And Safety
Master's Degree
2021-2022

Anadolu University

Civil Engineering
Bachelor's Degree, (100% English)
2013-2019

Halmstad University

Civil Engineering
Erasmus Mobility Programme
2018-2019

Anadolu University

Computer Programming
Present

COURSES

- Flutter Mobile Development - Udemy
- Frontend Web Development - Patika.dev
- Node.js Backend Development - Patika.dev
- JavaScript Algorithms and Data Structures - freeCodeCamp
- Primavera Project Management
- Certificate - Akim Mühendislik

SKILLS

- Flutter
- React.js
- Automation & Multi-Agent Workflows
- Firebase
- REST API Integration
- Logo Tiger ERP Integration
- Node.js
- Bluetooth / Embedded Systems (ESP32, Arduino)
- State Management (Provider, Riverpod, GetX)
- PDF Generation
- Data Modeling

SUMMARY

Software Developer specializing in Flutter, with hands-on experience in building enterprise-level applications including ERP, stock management, and system calculation tools. At BKS Holding, developed scalable mobile and backend systems, integrating with Logo Tiger ERP and optimizing business operations. Experienced in Flutter, Node.js, and embedded systems (Arduino, ESP32), with a focus on real-world problem solving and performance optimization.

EXPERIENCE

SOFTWARE DEVELOPER

Independent / Project-based

- Developed Flutter-based applications for municipal services, including water usage
2024 - Present

- billing systems, payment integrations, and data visualization dashboards
- Built payment collection features for field staff: QR code scanning, offline support, and Bluetooth receipt printing (using my own fork of the printer driver)
- Volunteered to design, develop, and publish **Go Baduk Weiqi Timer**, a Go (Baduk) tournament clock, on Google Play and the App Store for the Turkish Go Players Association
- Designed and developed **Siege Duel: Trap Strategy** (Kapan), a board game with a pure-Dart game engine, a 3-level AI, and ranked online multiplayer (matchmaking, Elo, leaderboards) on Firebase – on the App Store

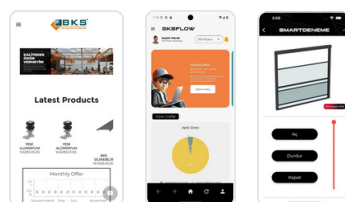

SOFTWARE DEVELOPER

01.2023 - 06.2026

BKS Holding

- Developed full-cycle mobile applications for dealers and customers, covering order creation, product configuration, and purchasing processes
- Integrated with Logo Tiger ERP system for real-time purchasing and stock synchronization
- Designed dynamic calculation systems for custom product configurations
- Developed PDF/Excel outputs for quotes and orders, along with chart-based reporting and dashboard screens

CIVIL ENGINEER

2019 - 2022

Asacivilengineer, I've gained expertise in managing projects, handling unexpected challenges, and building good relationships with people.
