EDUCATION

Gaziantep University

Occupational Health And Safety
Master's Degree
2021-2022

Anadolu University

Civil Engineering
Bachelor's Degree, (100% English)
2013-2019

Halmstad University

Civil Engineering
Erasmus Mobility Programme
2018-2019

Anadolu University

Computer Programming
2026

COURSES

- Flutter Mobile Development - Udemy
- Frontend Web Development - Patika.dev
- Node.js Backend Development - Patika.dev
- JavaScript Algorithms and Data Structures - freeCodeCamp
- Primavera Project Management Certificate - Akım Mühendislik

SKILLS

- Flutter / Dart
- Node.js · REST APIs
- Firebase (Auth, Firestore, FCM)
- React.js · Vite
- Logo Tiger ERP Integration
- PyTorch · Computer Vision (CNN)
- On-device AI (KataGo, custom models)
- WebRTC Voice / Video
- Bluetooth / Embedded (ESP32, Arduino)
- State Management (Riverpod, Provider)
- Automation & Multi-Agent Workflows

SUMMARY

Software Developer specializing in Flutter, with my own apps on Google Play and the App Store and three years of enterprise mobile and backend work at BKS Holding (dealer ordering, product configuration, real-time Logo Tiger ERP integration). Recent work includes Kento, a Go analysis app running KataGo fully on-device, and StoneNet, a CNN I trained in PyTorch to read board positions from photos. Also at home in Node.js, Firebase, React and embedded systems (ESP32, Arduino).

EXPERIENCE

SOFTWARE DEVELOPER

2024 - Present

Independent / Project-based

- Built and published **Kento** on [Google Play](#): a Go/Baduk recorder that photographs a real board into a digital game and analyses it with a fully offline, on-device KataGo engine – 11 languages, ad-free
- Trained **StoneNet**, custom CNNs in PyTorch, to detect board corners and classify every intersection from photos and video; exported the models to run on-device in Dart
- Volunteered to design, develop, and publish **Go Baduk Weiqi Timer**, a Go (Baduk) tournament clock, on [Google Play](#) and the [App Store](#) for the Turkish Go Players Association
- Designed and developed **Siege Duel: Trap Strategy** (Kapan), a board game with a pure-Dart game engine, a 3-level AI, and ranked online multiplayer (matchmaking, Elo, leaderboards) on Firebase – on the [App Store](#) and [Google Play](#)
- Developed Flutter apps for municipal services – water-usage billing, payment integrations, dashboards – and field collection with QR scanning, offline support and Bluetooth receipt printing

SOFTWARE DEVELOPER

01.2023 - 06.2026

BKS Holding

- Developed full-cycle mobile apps for dealers and customers – order creation, product configuration and purchasing – with dynamic pricing/measurement calculators for folding-glass, guillotine and sliding systems
- Integrated with Logo Tiger ERP for real-time purchasing and stock synchronization
- Developed PDF/Excel outputs for quotes and orders, chart-based reporting and dashboard screens
- Built **BKS Smart**, a Bluetooth/ESP32 control app for folding-glass and pergola systems, and **BKS Messenger**, the internal chat app with WebRTC voice/video calls

CIVIL ENGINEER

2019 - 2022

- Managed on-site project execution, field coordination and stakeholder relations on construction projects – the problem-first mindset I still build software with

PUBLISHED APPS

own work · Google Play & App Store

**Kento – Go & Baduk AI Analysis**

Photographs a real board into a digital game and reviews it with a fully offline KataGo engine. 11 languages.

GOOGLE PLAY

**Go / Baduk Tournament Timer**

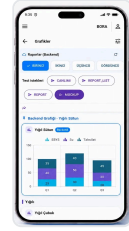

Tournament clock for the Turkish Go Players Association: Japanese and Canadian byo-yomi, 9 languages, fully offline.

GOOGLE PLAY · APP STORE

**Kapan – Siege Duel**

Trap-strategy board game: pure-Dart engine, 3-level AI, ranked online play (Elo, leaderboards) on Firebase.

APP STORE · GOOGLE PLAY

**Municipal Service Apps**

Water-usage billing, payments and dashboards; QR collection for field staff with offline mode and receipt printing.

CLIENT WORK · FLUTTER

ON-DEVICE COMPUTER VISION

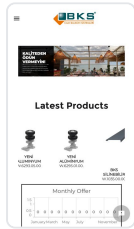

PyTorch · CNN · Dart

**StoneNet**

The vision pipeline behind Kento. Custom convolutional networks trained in PyTorch on synthetic and real data find the four board corners and classify every intersection as black, white or empty from photos and video. The models run entirely on-device in Dart – no server, no upload.

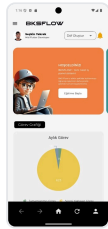

BKS HOLDING – ENTERPRISE APP FAMILY

2023-2026 · Flutter · Logo Tiger ERP

**BKS Panel**

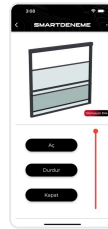

B2B platform for dealers: product catalog, pricing, orders and quotes, connected to Logo Tiger ERP.

GOOGLE PLAY

**BKS Flow**

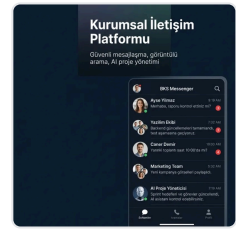

Enterprise workflow app with dynamic forms, approval flows and task/process tracking, with charts and reporting.

GOOGLE PLAY

**BKS Smart**

Opens, closes and controls the lighting of folding-glass, pergola and sliding systems over Bluetooth (ESP32).

GOOGLE PLAY

**BKS Messenger**

Internal communication app: one-to-one and group chat, WebRTC voice and video calls, multi-company accounts.

GOOGLE PLAY

CLIENT WEB & SYSTEMS

React · Vite · Firebase

**O.L.A Group**

Corporate site for a medical consultancy; every string in Turkish, English and Chinese.

OLAGRUP.COM

**Detay Mühendislik**

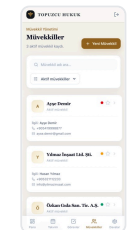

One-page site for an Ankara heat-pump installer, from a 60-second suitability check to a survey request.

ISIPOMPASI.VERCEL.APP

**İlgin Şal & Eşarp**

Store site with collections, a selection guide and FAQ, routing product questions to WhatsApp.

ILGINSAL.VERCEL.APP

**Topuzcu Hukuk**

Law-office management: clients, case files, tasks and calendar, collections and ledger.

REACT · FIREBASE
