SKILLS

- Flutter & Dart
- Riverpod & Provider
- Node.js & REST APIs
- Firebase: Auth, Firestore, FCM
- React & Vite
- Logo Tiger ERP integration
- PyTorch & computer vision
- Running AI models on mobile devices
- Bluetooth, ESP32 & Arduino

EDUCATION

Anadolu University

Computer Programming
2026

Gaziantep University

Occupational Health & Safety
Master's degree · 2021-2022

Anadolu University

Civil Engineering
Bachelor's degree · 2013-2019
Taught in English

Halmstad University

Civil Engineering
Erasmus exchange · 2018-2019

COURSES

- Flutter Mobile Development - Udemy
- Frontend Web Development - Patika.dev
- Node.js Backend Development - Patika.dev
- JavaScript Algorithms & Data Structures - freeCodeCamp

SUMMARY

Software developer with over three years of Flutter and backend experience. Built business apps at BKS Holding and published my own apps on Google Play and the App Store. I work with Flutter, Node.js and Firebase, and build web apps with React.

EXPERIENCE

Independent Projects

2024 - Present

Software Developer

- Built **Kento**, a mobile app that turns a photo of a Go board into a digital game and reviews it with an AI engine, fully offline. Published on Google Play.
- Trained my own **image-recognition models** (PyTorch) that find the board in a photo and read every stone on it, then made them run on the phone without a server.
- Built a **tournament clock app** for the Turkish Go Players Association as a volunteer. Published on Google Play and the App Store.
- Built **Kapan - Siege Duel**, a strategy game with a Dart game engine, AI opponents and ranked online play using Firebase. Published on both stores.
- Built municipal apps for water billing and payments, with QR scanning, offline support and Bluetooth receipt printing.
- Built React websites for clients and a Firebase app for a law office to manage cases, tasks and payments.

BKS Holding

Jan 2023 - Jun 2026

Software Developer

- Developed Flutter apps for dealer orders, quotes and product setup, with Node.js and Firebase services.
- Built measurement and price calculators for the company's made-to-order building products.
- Connected the apps to **Logo Tiger ERP** to keep stock, purchasing and order data in sync.
- Added PDF and Excel exports, reports, approval forms and dashboards.
- Worked on **BKS Smart**, a smart home app that controls motorised windows, roofs and lighting over Bluetooth.

Civil Engineer

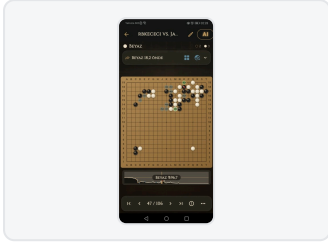

2019 - 2022

Construction Industry

- Managed construction work on site and coordinated teams and project schedules.

INDEPENDENT & CLIENT APPS

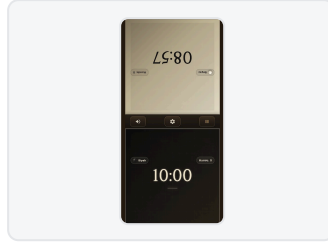

Flutter · Android & iOS

Kento

Turns a photo of a Go board into a digital game and reviews it with AI, offline.

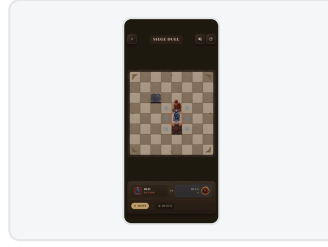

[Google Play](#)

Go Baduk Weiqi Timer

Offline tournament clock with the standard Go time controls.

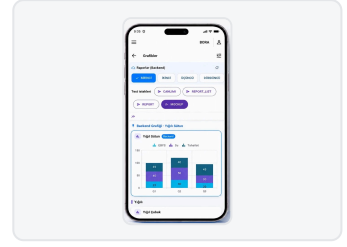

[Google Play](#) · [App Store](#)

Kapan – Siege Duel

Strategy board game with AI opponents and ranked online multiplayer.

[Google Play](#) · [App Store](#)

Municipal Service Apps

Water billing and payments, with offline field collection and receipt printing.

Client project

COMPUTER VISION – READING A BOARD FROM A PHOTO

PyTorch · image recognition · runs on the phone

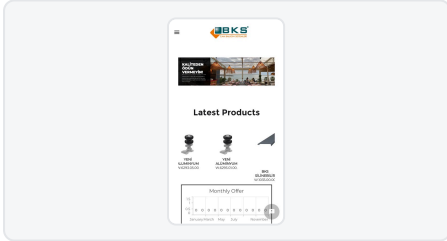

StoneNet – image recognition for Go boards

Models I trained that find a Go board in a photo and tell black stones, white stones and empty points apart. They run inside Kento, on the phone, with no server.

BKS HOLDING APPS

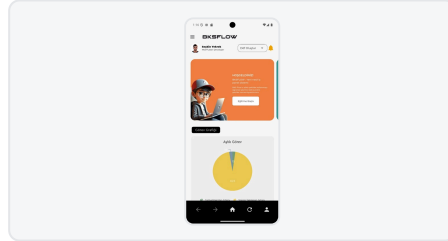

2023-2026 · Flutter

BKS Panel

Dealer orders, quotes and pricing, connected to Logo Tiger ERP.

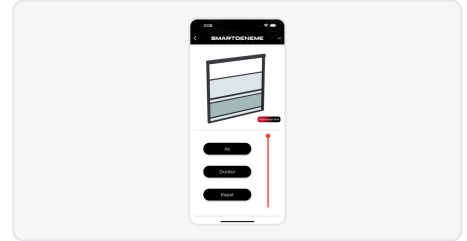

[Google Play](#)

BKS Flow

Forms, approvals and task tracking, with reports and dashboards.

[Google Play](#)

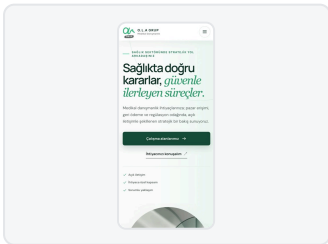

BKS Smart

Smart home app: controls motorised windows, roofs and lighting over Bluetooth.

[Google Play](#)

CLIENT WEB PROJECTS

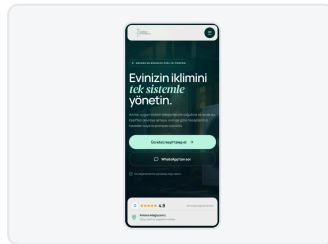

React · Vite · Firebase

O.L.A Group

Medical consultancy website in Turkish, English and Chinese.

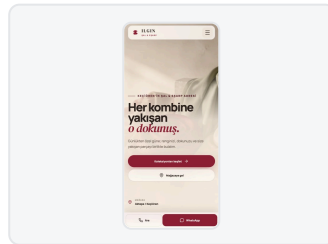

[olagrup.com](#)

Detay Mühendislik

Heat pump company website with a suitability check and survey request form.

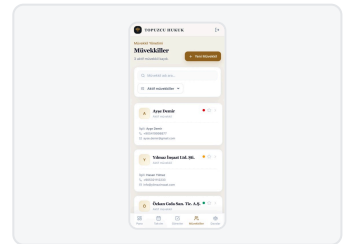

[isipompasi.vercel.app](#)

İlgin Şal & Eşarp

Scarf shop website with collections and product enquiries through WhatsApp.

[ilginsal.vercel.app](#)

Topuzcu Hukuk

Law office app for clients, cases, tasks and payment tracking.

Private client app
